Intelletto Technologies Announces Release Date of its UHF RFID MultiPort Companion – (INT201 SP)

Markham, Ontario – February 25, 2005, Intelletto Technologies Inc., a manufacturer of intelligent RFID devices, today announced that it will release its UHF RFID MultiPort Companion (INT201-SP) based on Sirit Inc.'s ST200 UHF platform in the second quarter of 2005. Intelletto's INT201-SP addresses the need for coexistence of barcode and RFID technology in distribution centers, warehousing, logistics and retail environments. The INT201-SP is EPCglobal™ (EPC) compatible and meets the requirements of the Wal-Mart and Department of Defense mandates for implementing RFID technology within the distribution chain.

Intelletto's UHF RFID MultiPort Companion is capable of reading data from either barcode labels or EPC compatible RFID tags and routing the captured data to the host computer. The INT201-SP also enables the user to scan barcode data using any handheld device, convert the data into an EPC/DOD standard format and write the converted data onto Class 0 and Class1 standard RFID tags.

"The INT201-SP is part of the RFID MultiPort Companion family of products which facilitate the implementation of HF or UHF RFID within an organization by enabling existing barcode oriented applications, to easily use RFID technology as well without the need to modify the application software" said Hassanali Namazi, Business Development Manager, Intelletto Technologies Inc. "By embedding the Sirit ST200 UHF reader in the new INT201-SP, we have confidence that we are delivering a high performance product that will meet the growing market demands as our customers implement their barcode/RFID migration strategies."

"Sirit offers a range of RFID reader modules that are designed to be easily integrated into products like Intelletto's INT201-SP," commented Joe Clear, Director OEM Sales, Sirit Inc. "We look forward to a long and growing relationship with Intelletto as they continue to develop devices that enable their customers to navigate the exciting world of RFID."

About RFID

Radio frequency identification (RFID) is a method of remotely storing and retrieving data using devices called RFID tags without line of sight. An RFID tag is a small microchip packaged like an adhesive sticker that can be attached to or incorporated into a product. RFID tags contain antennas to enable them to receive and respond to radio-frequency queries from an RFID reader or interrogator.

About Sirit Inc.

Founded in 1993, Sirit Inc. (TSX:SI) is a leading provider of Radio Frequency Identification (“RFID”) solutions to customers worldwide supporting a broad range of RFID tags (EPCglobal™ and ISO) and frequencies (LF/HF/UHF).. The company designs, manufactures, integrates and sells RFID solutions with an emphasis in several vertical markets including Supply Chain Management, Product Authentication, Asset Tracking, Security and Access Control and Automatic Vehicle Identification. The Company’s embedded modules serve as the core RFID reader engines which power equipment from industry leaders, including handheld/stationary/vehicle mount terminals, label printers, conveyor systems and other devices Building upon years of success deploying traditional RFID products, Sirit continues to capitalize on the growing demand for next generation RFID solutions. For more information on Sirit visit www.sirit.com or call 1-800-498-8760.

About Intelletto Technologies Inc.

Intelletto Technologies designs, develops and manufactures RFID based hardware products that would minimize the need for software integration and modifications. Intelletto’s product strategy is based on recognizing the challenges of RFID implementation and minimizing it. Intelletto product line allows companies to increase their productivity and return on investment and empowers them to proceed with their RFID implementation with a gradual approach. At Intelletto, our vision is to change the way people view RFID and help them to draw the big picture piece by piece.

Intelletto was founded in 2003 by a team of software and hardware professionals in Ontario, Canada. Company can be reached at (905) 943 4260 or www.intelletto.com
