Intelletto Technologies announces the release of RFID MultiPort Companion

Markham, Ontario – September 7th, 2004, Intelletto Technologies a provider of RFID solutions focused on solving business problems, today announced the release of its RFID MultiPort Companion. MultiPort Companion allows existing applications to use barcode and RFID at the same time without the need to modify the application software. Engineered to integrate barcode and RFID technologies, the RFID Multiport Companion creates a single, efficient and economical identification system that allows gradual migration or transparent co-existence of barcode and RFID for the client.

Intelletto Technologies Inc.
Intelletto Technologies designs, develops and manufactures RFID based appliances that would minimize the need for software integration and modifications. Intelletto's product strategy is based on recognizing the challenges of RFID implementation and minimizing it. Intelletto product line allows companies to increase their productivity and return on investment and empowers them to proceed with their RFID implementation with a gradual approach. At Intelletto, our vision is to change the way people view RFID and help them to draw the big picture piece by piece.

Intelletto was founded in 2003 by a team of software and hardware professionals in Ontario, Canada. Company can be reached at (905) 943 4260 or www.intelletto.com

About RFID
Radio frequency identification (RFID) is a method of remotely storing and retrieving data using devices called RFID tags without clear line of sight. An RFID tag is a small microchip embedded in some package like an adhesive sticker that can be attached to or incorporated into a product. RFID tags contain antennas to enable them to receive and respond to radio-frequency queries from an RFID reader or interrogator.
